"CLIPS, QUOTES, and COMMENTS" is issued on the first and fifteenth of each month, by the Borderland Sciences Research Associates -- -- 3524 Adams Avenue, San Diego 16, California, U.S.A. - -- Twelve issues (6 months) for $5.00; six issues (3 months) for $2.50; two issues for $1.00. Contains only short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN.
- N. Meade Layne, (M.A.) National Director.

10/1/54 U.F.O. NEWS - CONTEMPORARY PUBLICATIONS:

As most of our Associates know, the BSR does not attempt to print even a synopsis of reports about unidentified flying objects. We could fill 50 pages with such material in every bi-weekly issue of Clips & Quotes. We stopped arguing about the reality or 'factuality' of the objects some five years ago; that question was already closed for all honest and informed persons. The all-important problem is the interpretation of these happenings. WHO or what are these visitors, and whence do they come, and why? And what is their attitude toward us - what does their coming portend? There are thousands of pages of fantastic data, much of it very disquieting, but it is the significance of these facts which is of supreme import. A six-legged Disc Man may seem no more important per se than a two-headed calf, until we find out (maybe) that he is a hope or a threat of planetary scope.

This doesn't mean that we fail to read some two dozen publications dealing with this subject. Meticulous reports from all parts of the world should be examined with the utmost attention. It doesn't mean that we don't want clips. We can't print them and usually fail even to acknowledge them - but we DO read them and want all we can get. But the objective is not to build up a "believe-it-or-not"book of wonders, nor to prove the existence of the flying Discs. What we want are not repetat ions but varia - happenings which shed additional light on the powers, capacities & intent of our Visitors. There is no hope of a complete picture, but it is of high importance to try for one. And for the last ten years we have had the advantage of an inclusive hypothesis (or theory or interpretation) under which nearly all (and perhaps ALL) of the phenomena may be subsumed. This interpretation was NOT dreamed up by the BSR Director or his Associates - and it is one which makes good science and sound metaphysics. It is not religionistic nor cultist, but cold-bloodedly factual. But it is not understandable at first glance, or congenial to Western ways of thinking, or to text book scientism. As may be expected, it is attacked violently by people who have never tried to understand it, and probably never will.

It is against this background that we have continued to study the UFO phenomena, and our objective (once again) is to "get across" the 4-D or Etheric interpretation of them at least to the intelligent minority. Or it is better to say, we are trying to offer this interpretation in understandable terms, to those who find it worth their while.- not to get it, or anything "across" in the sense of propaganda. The BSR, like many similar organizations throughout the world, is conceived & conducted as a matter of public service.

Meanwhile our contemporaries are doing a magnificent job of collecting data and making them accessible. There are a dozen publications which we would like to supply free to our Associates if our funds permitted. And the world-wide contacts developed in this way, may some time prove of extreme importance. We would like to see some one establish a Digest or Review of such publications - of a factual, reasonably critical, and non-commercial sort. Our millionaire playboys and many opulent Foundations, troubled by the how-to-spend-it problem, might thus do a good deed or many of them, in an ignorant but increasingly apprehensive world.

(next page)

For exposition of the 4-D or Etheric Interpretation, see BSR publications: The Mystery of the Etherships & its Solution ($2.00); The Coming of the Guardians ($3.00): Flying Saucers (by Rolf Telano & the Nors), $1.00: The Interpretation of the Aeroforms (7 pages, free): The Ether of Space (compendium) ($1.50): nearly all issues of Round Robin (bi-monthly; singles .50 - sample copy free): many bulletins and releases (mimeo. material) from BSR Hdqrs. 3524 Adams Ave., San Diego 16,Calif.)

The Saucerian: Pub. by Gray Barker; Box 2228, Clarksburg, W. Va. "World's largest Flying Saucer Publication". Current issue, Sept. 1954: Vol. II, No. 2. Single copy 35¢: 6 issues for $2.00. (6 x 9", 40 pgs). Articles include:

More on the Canadian Monster: summary of article by BSR Assoc. E.S.S. first printed in Round Robin for July-August. -- They Saw a Saucer Woman, by D.C. Lucchesi -- The Van Tassel Saucer Meeting -- The Coniston Saucer -- I Saw a Saucer Crash -- Monsters Terrify Nickel Worker -- The Wild Rumour Column -- Two Men from Venus -- The New Saucer Books (Williamson, Wilkins, Bethurum). . . We are especially glad to note a very favorable review of the book by H.T. Wilkins, "Flying Saucers on the Attack", described as "a book no student of saucer phenomena should be without". This book is identical with "Flying Saucers on the Moon", published in England; the American publishers changed the title without the author's consent, for obvious and unsatisfactory reasons. -- The "Saucernews" section, 11 pages, contains about 20 items, all interesting, some of them novel. Illustrated. The Saucerian is a quarterly, but publication dates vary somewhat.

C.R.I.F.O. Newsletter: (Civilian Research, Interplanetary Flying Objects). L. H. Stringfield, Director. P.O. Box 1855, Cincinnati 27, Ohio. Published first Friday of each month. Seven pages, printed, 8½ x 11". 25¢ per copy, $2.00 per yr.

The Sept. 3 issue (Vol. I No.6) is particularly interesting for insight into official attitudes and scientific pronouncements - tho' of course no statement can be taken as representative of opinion in the latter group. Previously recommended to BSR Associates, in our CQC-C-5 and elsewhere.

The Saucer Symposium, conducted by Dr. George H. Williamson in VALOR magazine, invariably contains at least one detailed and dependable item , written up by an experienced investigator (Dr.W.) and well worth careful reading. Dr. Williamson is the co-author of The Saucers Speak, and has another book nearly ready for publication. VALOR is published at Noblesville, Ind.(Weekly)-1 yr. $5.00.

The Little Listening Post: 4811 Illinois Ave.,N.W., Washington D.C. "Released every few weeks when the news boils over ... Operated on a good-will basis and sent to those who help make it possible by DONATION." Three-four pages, size of this one, very newsy and all the items are interesting. Wide-spread scepticism about the existence of the aeroforms still springs from ignorance of the vast and complicated mass of data; and this ignorance comes from lack of interest - which invites a rude awakening. One thing the reader can do - subscribe or buy a few copies of a recommended "saucer" publication, mark a few items in red, and send it where it may help to wake someone up. The Little Listening Post is ideal for the purpose.

- - - - - - - - - - - - - -

The Radiation Reporter: Published quarterly by the Radiation Research Fellowship (a non-profit organization): P.O. Box 3183 - Hollywood Sta., Hollywood 28, Calif. James de Marchi, Editor: Peggy Jett, Assoc. Ed. Vol. 1, No. 3 has a lead article on Dr. Charles W. Littlefield and his research in bio-genesis. Several years ago the BSR devoted part of a booklet* to this subject. The book From Mineral to Man (225 pgs is out of print, but Man, Minerals & Masters was printed by De Vorss & Company, 516 West 9th St., Los Angeles 15, California, in 1937. (continued) -

- - - - - - - - - - - - -

(both by Dr. Littlefield). This work, like that of Morley-Martin, is extraordinary and of great importance but has been consistently ignored.

"Biogenesis is the creation of living substance from inert matter. The human body is made up of 14 basic elements, 12 of which combine in groups to form 12 basic mineral salts. Burning a dead body produces the ash of these 12 salts, but these bear no resemblance to cell structures of the living body . How did the change in form take place, from "dead" to "living" substance? "

Dr. Littlefield made a detailed study of the crystalline patterns observable under a microscope of each of the 12 mineral salts. By moistening these particles, letting the water evaporate, and repeating this process many times, the salt particles become "charged with vital force". They have independent motion and behave as if alive. Their crystalline pattern is different from the normal pattern of salts which have not been evaporated. These "vitalized salts", maintained in solution, will aggregate and form replicas of tissue fibers - each building a different type of body tissue. And the salt which formed a tissue in the first place, is the remedy which rebuilds that tissue after it has become damaged or diseased. . . And combinations of several salts produced microscopic life forms - prototypes of plants, reptiles, birds and animals. . .

An admirable abstract of The Beginning and Way of Life (Littlefield) has been prepared, under the title BIO-GENESIS, by Mark L. Gallert, and may be obtained from BSR Hdqrs. (12 pgs. mimeo., 7 x 10". $1.00).

Other recent issues of the Radiation Reporter featured articles on DR. OSCAR BRUNLER (Vol.1, No.1); LEONARDO DA VINCI (Vol.1 No.2); THE HOLY SHROUD OF TURIN (Vol.1 No. 3).

REPORT OF AIR ARMADA OVER CALIFORNIA:

Sacramento, Sept. 11 (UP): "The Air Force said today it is making a thorough investigation of the reported sighting last night near Redding of an aerial armada of 200 planes. The reports came from a forest service lookout and two youths manning a ground observer post at Central Valley, Calif., in Shasta County. The two boys reported they counted 219 aircraft flying south between 8:10 and 8:34 last night.".

Air Force jet interceptors were sent up but "found nothing unusual."

Santa Barbara News Press

UFO OVER ROME: (Sept. 18, '54, AP).

Startled Romans who saw a strange cigar - shaped object streaking over the capital flooded newspaper offices today with anxious calls. Radar operators also reported picking up the missile last night on their instruments.. Technicians at Ciampino Airfield described the object as a 'half-cigar' which appeared at one instant to plumet toward the earth for more than 1000 feet, then rose at tremendous speed and finally vanished ..."

FIREBALL OVER ALBUQUERQUE: (Sept. 18, AP):"Thousands of people saw a huge fireball light dark New Mexico skies tonight. A crowd at a Santa Fe football game saw the ball light up the sky for almost 15 minutes. Some said it left a luminous trail."

The broadcaster Paul Harvey, referring to this (9-20-54) said in effect: "About the fireball seen last Saturday, Dr. Lincoln LaPaz of the University of New Mexico, says maybe it was not a meteorite at all. After a day in the Chico hills interviewing people, he said it was (quote) "something queer".

So now we know!

-(Foregoing 3 items from Assoc. George C. Wilson).

Quaruble, France. 9-13-54. Reuter dispatch describes "two little armless men in space helmets, about 3 ft. tall, who landed in an 18' "saucer". Bright glow, black smoke, green light, hissing sounds, burned spot left behind. (Assoc. Wm. Hurley).

REPORTS FROM AUSTRALIA -
From Flying Saucers, Vol. II No. 1. Pub. by Civilian Saucer Investigation; P.O. Box 1914, Auckland, New Zealand. (Abstract).

. . . Since January 1954 to date of issue the appearance of 'unidentified objects' in Australian skies has climbed to a figure that can only be expressed as phenomenal. There have been literally thousands of reports and Australian newspapers have gone hardly a day without mention of further incidents. The government has been officially investigating via the R.A.A.F. and the Civil Aviation Dept. for some years, but never with the openness and seriousness of these last few months.

Mr. Edgar R. Jarrold, Director of the Australian F.S. Bureau, has likewise been swamped with thousands of reports. . . He has received the green light from official quarters and the AFSB may not be much longer classed as an unofficial agency We recommend all our readers to send an 8-shilling money order to AFSB Hdqrs, 3 Ferguson Ave., Fairfield, Australia and obtain copies of the Bureau's magazine (8 shillings for 4 issues, quarterly. (At present/rates one shilling is .15; some publishers in England rate it at 20¢. ml) postal exchange

ENGLAND too is receiving her share of reports; and at about the same date as the very close approaches were made by UFO to groups of YOUNG people in Melbourne, similar happenings were reported in Hampshire and Somerset, Eng. Reports are widespread and becoming more frequent daily, and recently the BBC News Review featured an interview with Capt. James Howard, Captain and Chief Pilot of a British Overseas Airways Corp.

(Capt. Howard's plane was followed for 80 miles by seven flying black objects, near Labrador, altitude 10,000 ft. The objects flashed into sight suddenly and remained for 18 minutes. There was a big central object which appeared to keep changing shape - like a flying jellyfish. Sometimes it was wedgeshaped, sometimes like a dumbbell, sometimes like a sphere with a tail-like projection. The six smaller objects dodged about in front and behind. Ten members of the crew and most of the 51 passengers awake at the time saw the objects. <u>All were interviewed by the U.S. Air Force Intelligence</u>. (underscored by ML)

I point out once again, that incessant mutations of shape cannot always be accounted for by changing angles of observation or by maneuvers of the object observed. Nearly all the airborne UFOs are mutants, and often appear and disappear by making themselves transparent or becoming invisible by some other means - <u>not</u> by rapid withdrawal in space. This points to the fact that they are not made out of matter as we commonly use the word, but of a finer and more dense substance which is best described as etheric - and which is subject to instant control by forces we cannot manipulate, including almost certainly the 'energy' of thought. The fact that 'landed' Discs are apparently quite solid and material has led nearly all investigators to overlook their true nature. Their density and rigidity is a temporary characteristic, and the Discs adjust to the densities of air, water, and earth with equal facility.

C . . Concerning the warning lately issued to Bahai groups in N.Y., San F'co, Chicago and Los Angeles: our Regional Director H.M.Wagner (De Funiak Springs, Fla., Rt. 2 Box 227) writes us: "Our communicators quite clearly did not refer to terrestial upheavals alone. One of them remarked: "Yes, there will be catastrophes, local in nature, but more and more frequent and involving wider areas. But as Oahspe states, when the grade of a city falls below a certain level, turmoils arise. These have destroyed many cities in the past". It would seem from this that perhaps social and not terrestial troubles may lie ahead. . .' (HMW)

Violent seismic and weather disturbances are already becoming frequent, and the ancient teaching is that these are related to, and often produced by social conditions. (ml).

Letter Received from:

DROSNES-LAZENBY CANCER CLINIC
4774 Liberty Ave.,Pittsburgh 24, Pa.

"Dear Director:

We acknowledge receipt of your postal making inquiry on descriptive and supporting evidence on our work as well as to change in our set-up.

First of all, it is with deep regret that we have to advise that our Dr. Paul A. Murray suffered a cerebral accident in January of this year and died on the 7th. Since our Dr. Wilson was on leave to the U.S. Navy at the time we were confronted with a serious situation in that we had no doctor here and, of course, we practically had to cease as we would have been liable to arrest for practicing medicine without a license.

With the cooperation of Dr. Wilson we worked out a temporary plan whereby all patients were referred to him in Baltimore where he was stationed, pending his return in May of this year. However, upon his release it was decided that these premises were to be turned over completely for cancer research, and all patients and inquiries were to be referred to him at his private office at 4201 Murray Avenue, Pittsburgh 17, Pa. This situation obtains at present and our therapy is now dispensed by him in this manner. This is working out a little better than we had anticipated in that it does give Mrs. Lazenby and myself more time to devote to our experiment.

As to our results during the last 6½ years, wish to advise that we have treated over 1900 patients, men, women and children, all terminal cases, in all types of malignancies, and have found our therapy,called Mucorhicin and administered orally, to have no toxic reactions or side effects in a single instance.

Of this 100% mortality group we have some of these patients now living 6 years, 5 years, 4 years, etc., past their expectancy,pain and symptom free. Our percentage of symptomatic relief has been better than 90% and our laboratory results with mice have been extremely encouraging.

We are using a mold substrate, harvested from a formula of wheat, yeast, salt and water, which contains Mucor, Rhizopus, and various strains of Penecillium as analyzed by the U.S. Public Health Service. Our new approach to the cancer problem by use of anti-biotics has indicated that our therapy is beneficial in other degenerative diseases.

We have never been subsidized, in fact we are in the red thousands of dollars, and are forced to charge a nominal fee in order to help defray expenses. This fee, of course, comes from Dr. Wilson through his dispensing our medication. We have never been investigated, as the public has been led to believe, but we intend to continue as long as humanly possible.

To support our progress we are enclosing some case summaries as requested.

We are also enclosing Dr. Wilson's interpretation of a rat experiment he conducted with Mucorhicin, showing the outstanding results obtained in our laboratory, via the oral route.

In addition, we are including assays on Mucorhicin which were conducted just recently.

Incidentally, we extend an invitation to you and your friends to visit with us and we shall be happy to take you through, let you look at our records, and answer any and all pertinent questions as we have nothing to hide. Dr. Wilson will be happy to talk with you and we will try and have some of our living patients come in.

Thank you very much, and with kind regards, I am

Yours very truly,

(signed) Philip L. Drosnes"

Miscellaneous:

THE HYDROGEN BOMB: A long article under this title (by-line: How the U.S. almost lost it) appears in U.S. News & World Report, for Sept. 24, 1954. Written by James R Shepley and Clay Blair, it is an astonishing revelation of the extent to which national policy and governmental affairs generally have been penetrated by top-level scientists. Since this article appeared, co-author Shepley has offered to buy up all rights in the book ms on which it is based, with the idea (as he is quoted in the press) of storing it away for 25 years or so, "until most of the people concernd are dead". Dr. J. Robert Oppenheimer is blamed for the near-loss of national superiority, and Dr. J. Edward Teller credited with the successful opposition. The book will appear Sept. 30, 1954. David McKay Co., Inc. N.Y.

THE HOXSEY TREATMENT: A record of cancer cures, explaining the Hoxsey System of treatment in theory and practise. Published by DEFENDER, Wichita, Kansas. 127 pages. Order from the publishers. Price $1.00. Both directly and by implication this book is a blistering indictment of organized medicine (often described by us as public enemy number 1) - as well as a sun-burst of hope to its millions of victims.

There are now at least four successful treatments for cancer, and the way for each of us to help is to see that every sufferer from this disease gets full information and warning against 'orthodox' medical treatments (surgery, X-ray, radium).

DANIEL W.FRY, TECHNICIAN: - and author of THE WHITE SANDS INCIDENT - which all of our Associates have read (we hope). It is reliably reported to BSR Hdqrs., that Mr. Fry has for a long time suffered what can only be described as persecution, with respect to employment and in social contacts, beginning with the time when he left his position at White Sands. What is the reason for this? We don't know, but we can guess, can't we? (Or is that getting risky too?). We have pointed out before, that various scientific concepts touched upon by the invisible communicator (in talking with Mr. Fry), though in the region of super-physics, have the air of being very sound and productive, and of integrating closely with many statements made by the Mark Probert Controls during the last eight years (see our Coming of the Guardians for this). Well, our guess is, Mr. Fry's unseen guide was talking too close to the truth for the comfort of certain great ones, in science, politics, and finance (the three being now 'identical triplets'). . . Our discomfort is, that the mills of the Gods grind slowly - too slowly for human patience.

THE WHITE SANDS INCIDENT is published by the New Age Publishing Co., 1542 Glendale Blvd., Los Angeles 26, Calif. 66 pgs. $1.50

MARK PROBERT, well-known medium, with his wife Irene, is now on his second extended trip to the eastern States. They expect to visit Los Angeles, San Francisco, Salt Lake, Chicago, Buffalo, New York City, possibly other points. Mark P. is the medium whose work has been carefully observed by BSR Associates for eight years past; the communications (given in deep trance) deal almost wholly with science, philosophy, metaphysics, and psychology, and have attracted the attention of many specialists in these subjects. These communicators are responsible also for the EMERGENT, or "4-D" or ETHERIC interpretation of the aeroforms, given by them in 1946 and well justified by subsequent events.

The recent BSR publications: Story of Creation and The Coming of the Guardians, are largely quotations from the Probert Controls just mentioned (printed by permission of Mark Probert). First of these, 18 pgs., $1.50; 2nd, 64 pgs. $3.00. Order from BSR Hdqrs., 3524 Adams Ave., San Diego 16, Calif.

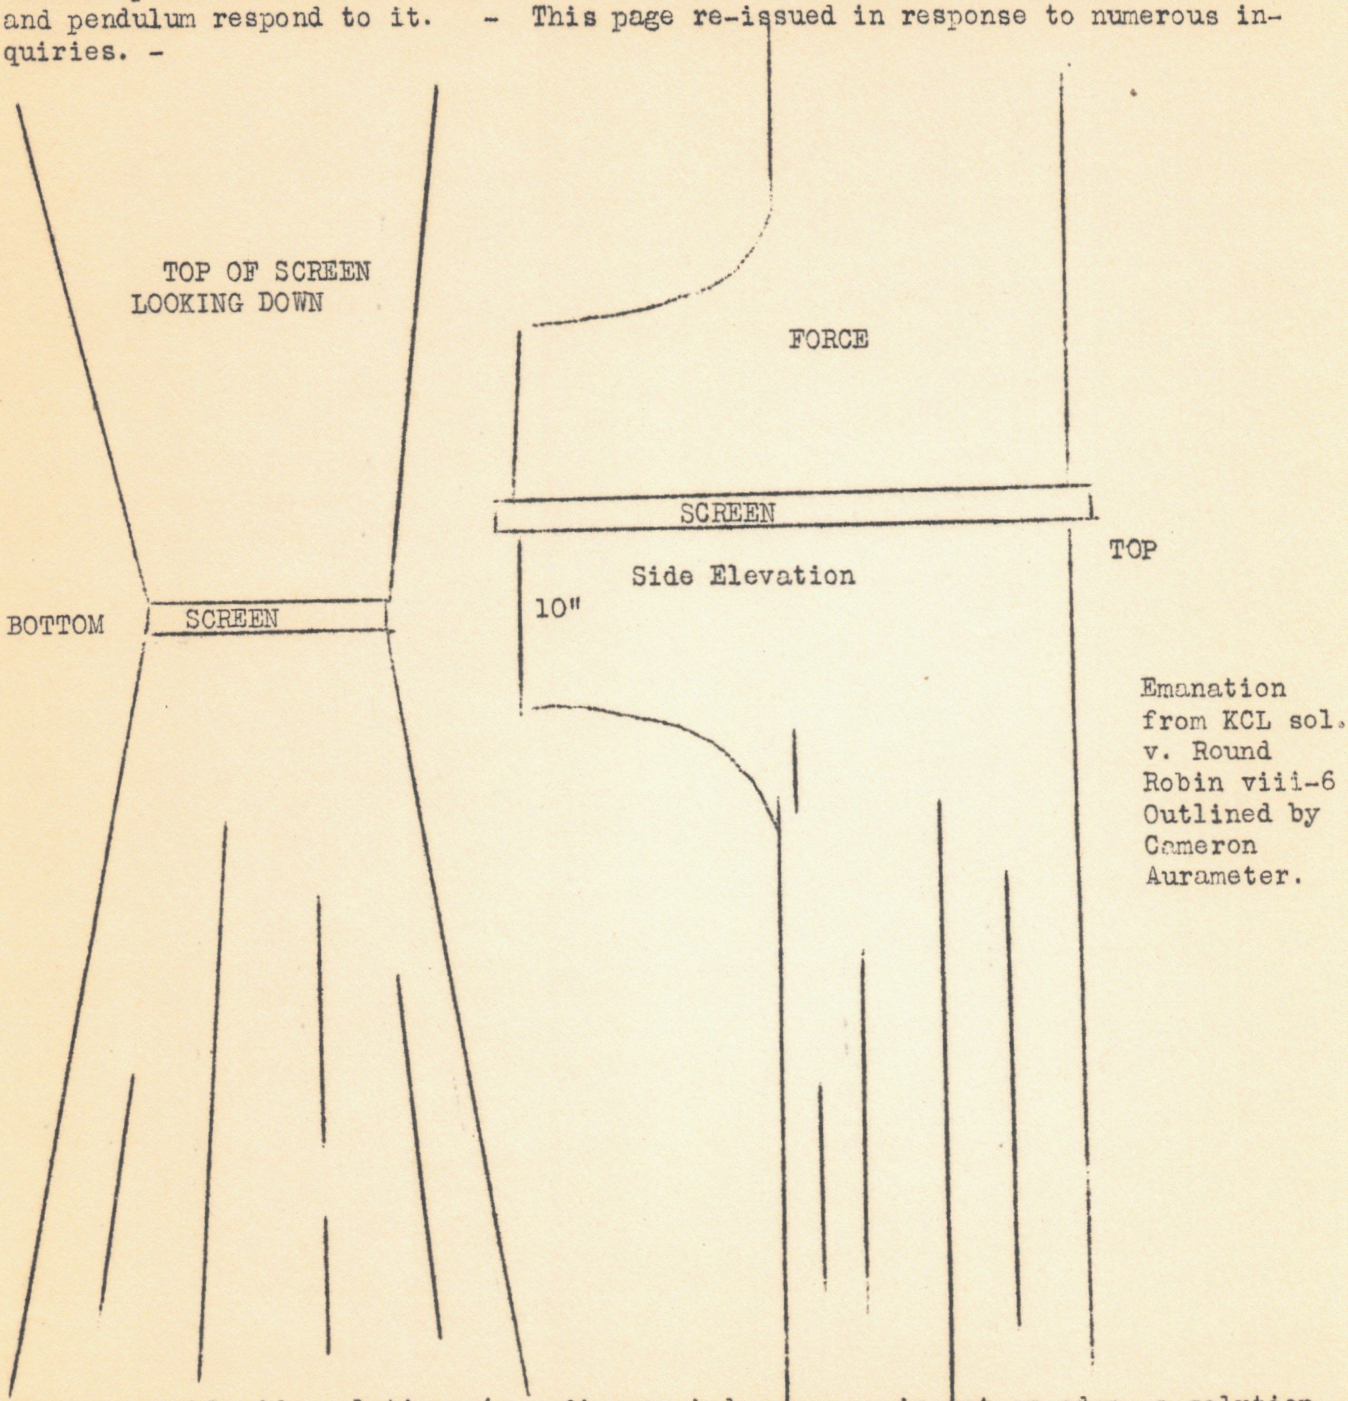
THE SEANOR SCREEN

(Assoc. H.G. Seanor; C/ BSR Hdqrs.

An Unknown Emanation: This screen will not throw a ray downward; the ray is not interrupted by glass; it seems to promote germination of seeds; to some persons it feels cold, or cool; in some it relieves fatigue. The aurameter and pendulum respond to it. - This page re-issued in response to numerous inquiries. -



Emanation from KCL sol. v. Round Robin viii-6 Outlined by Cameron Aurameter.

Potassium chloride solution. An ordinary window screen is set on edge, a solution of KCL in water is placed in a container, a few turns of wire are inserted in the solution and the other end of the wire attached to the screen. THE TOP OF THIS DRAWING IS TO YOUR RIGHT. (Treatment by the emanations of drugs and chemicals is becoming widely known in radiesthesia and the field of possible experimentation is limitless. ML)

"C.Q.C.C-8
16-15-54

Letter Received: (Associate Mrs. W.A.C., Hemet, California, to "Clips, Quotes, and Comments" editor:)

Mrs. W.A.C. refers to "green gas balls over a small town in Texas", and then continues as follows:

. ."This last one is a honey -- came through radio by Burrett Wheeler, station K.F.I. It seems there was an article by one Al Thrasher called "The Woman Dozing On The Porch". This woman, on waking found a piece of brown paper with a strange design on it, laying in her lap. She couldn't understand it, but thought it looked like a radio design, and that the boy next door who tinkered with such things, had seen her asleep and had played a trick on her. So at the first opportunity she called him in, and laid the paper by the cookies and lemonade, and he pounced on it at once, and asked how come she had a funny radio design. Seeing by his excitement that the drawing was not his -- she let him have it to experiment with -- and the boy went to work.

Well, it seems the box had no speaking apparatus, but gave off a series of light signals, so the boy smashed up the thing, and his father burned the whole contraption.

Burrett Wheeler read the story, and at once got in touch with the boy at his home, found him in his workshop, and got him to talk about the box he made. Then Mr. Wheeler had a bright idea. He asked if the boy still had the paper on which he dotted down the series of flashes, which were given in three's, and repeated. After scrabbling around on the floor, they found the paper (which Mr. Wheeler now has), and the dots and dashes spelled out V E N I M U S, which gave Mr. Wheeler some nights of research. Finally he got to the Latin Venimus -- "We are coming."

. . . . . (letter dated September 27, 1954.)

SPIRIT RADIO: (From The Little Listening Post: current issue): *

K.M. KELLER Head of London branch, Spirit Electronic Communication Society, predicts success within five years. Funds and concentrated effort vital. "I have constructed several ultra-high frequency instruments with a view to tuning in on radiations generated in the etheric body of a human. It seems that if we can detect these finer radiations it will be possible to receive them from an excarnate being who still retains an etheric body and hence has auric frequencies similar to our own. This is the sum and substance of spirit communication by electronic means. The big difficulty is the wide range of frequencies covered; they are above those normally used and hence are not easily calibrated or controlled..." Mr. Keller and his wife will arrive in November to continue his researches in California...'END *

To my own way of thinking it is quite certain, that the basic contentions of spiritism (and spiritualism), viz., survival of the human personality and communication with the here-living, will in the course of a decade or so be generally accepted and axiomatic. So far, the problem of the ether ships and that of spiritualism have been kept fairly well separated. A few voices have been heard, announcing that our etherian visitors are really excarnate humans. The BSR publications have never taken this view.

The obviously material nature of the 'landed' Discs, of course rules out any 'spirit interpretation' for a great number of people who do not understand the terms and concepts used in occult and spiritistic literature - 'mat' and 'demat', teleportation, apportation and many others. These terms are now becoming integrated with scientific investigations, but still carry the bar sinister with text-book science and religious orthodoxy.

*Pub. at 4811 Illinois Ave., N.W. Washington, D.C.

Over

At one time our misunderstanding of certain expressions usd by the Rolf Telano communicators, led us to state that these entities from the flying discs were ex - carnate humans. The communicators corrected this and we immediately made the necessary corrections in our published material.

The situation seems to be, that the average excarnate human in the astral worlds knows nothing whatever about etheric worlds and people. He learned nothing about them in this life, and after death has no power to adjust himself to the vibratory frequencies of etheric levels. Yet there are undoubted exceptions to this, and it also seems to be true that some earth people can and do enter the etheric regions, either at death or at some later time in their astral experience. And we are told that some excarnate humans do indeed visit us in the etheric ships.

The term etheric and etherian is of course highly indefinite and incapable of clean-cut definition. On the whole it refers to material objects, worlds, and people existing in etheric matter - which is not normally visible or tangible to our senses. And a 'true' etheric being is born, and dies, and reincarnates on his own etheric level of existence. And any etheric object (a 'ship' or person or any object) when materialized in our world is as real and solid as anything else -- and on the etheric level is also real and solid - or more so.- but then outside our sense perception.

Since the fall of 1946 the BSR Director, along with various local Associates, has received much help from an exceptional group of excarnate persons, communicating through the deep-trance mediumship of Mark Probert. These persons claim to have contact at will with etherian worlds and people, and after eight years and hundreds of hours of contact with them, I retain great confidence in their knowledge and integrity. They are responsible for 'our' "4-D" interpretation of the aeroforms, and subsequent data substantiate or do not contradict it. Thousands of details remain inexplicable in themselves, but the basic interpretation given by these Controls seems to me to be valid.

This then is where we stand with respect to spiritualism. We accept survival and communication, and believe that contact with very wise humans of the astral planes is possible and extremely valuable. It is a legitimate source of knowledge. Spiritualism, however, goes much further than this; it is a form of religionism and has a religionistic organization. We do not oppose this, but our own concern is with a factual and scientific approach and a collating of what seems to be valid and useful data, from all sources.

And to return to our first paragraph above, we think one of the great basic acceptances of the "new World" knowledge, will be personal survival and communication - along with that of the etheric body of man, the etheric duplicates of objects, and the worlds and knowledge of etheric races.- whatever names may be applied to them. We think the New World (if any) will be really new, in the basics of knowledge and thought, and not a patched reconstruction of our present-day existence.

- - - - - - - - - -

Under the heading "Stars in your Eyes, Not Saucers" the San Diego Union of Oct. 10, '54, prints a statement from the Air Force to the effect that "seven years of investigation fail to uncover any proof of the existence of flying saucers... etc"

On Oct. 11 the same paper prints an article headed "Five Parts of the World Report Saucers" - Germany, Belgium, Egypt, Argentina, Lebanon, and the French Cameroons. The German story includes "creatures less than 4 ft. tall" - the 4th or 5th reappearance of the "little men" story in recent weeks.

The only thing more extraordinary than the Saucers themselves would be the inside story of the Air Force with reference to them - if only some truthful James would make it public.

"C.Q.C." C-8
October 15, 1954

Letter Received: (from Associate H. T. Wilkins, England)* "Exactly one month after I had seen from my bedroom window, in a house on a low hill in N. Kent, a space ship, like a red cylinder, on fire from end to end, but with no emission of flames, no fins, ports, propellers or fuselage, flying southwest on a course from about Chatham Dockyard to the west of England, horizontally --- so, not a flare, or rocket-missile -- faster than a jet, at 5:25 A.M., on July 23, 1954, there was seen on August 23, a similar object --called a cigar-shaped object, over the Seine, about due east from here, near Paris. On August 23, the cigar-shaped object was noticed to be linked with a discoidal satellite object.

Having occasion - and wasting my time - to draw the attention of the British War Office to a blatant and impudent hoax, in the N.Y. magazine "Sir", alleging that a 'flying saucer' had been forced down in Heligoland, western Germany --a former fortified island of the German Kaiser's day -- with "Seven men burned beyond recognition", and with mysterious and unknown instruments on board, together with script in unknown language and form - I also drew notice to my own sighting of a space-ship. The report was totally ignored by the War Office, exactly as the London Daily Mail and the London News-Chronicle news editors discourteously ignored my report, sent them immediately after my sighting on July 23 last. I am frequently asked by correspondents, both in U.S. and here, why I do not report these matters to the so-called national British newspapers and to relevant British Government departments.- Perhaps those who waste my time in this way will take note what is said above.

"One may also ask why the Norwegian Air Force did not produce the alleged U.S. helicopter airman, who, they allege, was the entity seen by two women, in a flat place in the hills near Mosjoen, Helgeland, on August 24, 1954. These two women, who were blackberrying, say positively that the being motioned them to follow him to a disc, like two Saucers on each other, fifteen feet in diameter, standing in a dell. He showed them drawings and they tried him in four languages, including English, none of which he understood. They say he climbed into the Saucer, which then hummed and ascended vertically, at great speed. -- It seems very odd that, if this were an American airman with the Norwegian Air Force, both the women and he did not understand each other, when the women spoke in both Norse and English. The women say he would not let them shake hands with him, and they firmly contend that the 'Saucerman' was not an American airman, but a 'Martian'. - Why has not the name of the American been given in this alleged dementi?-It looks as if the clever policy is that the most blatant hoax may be accepted by the U.S. press- does it not ultimately cover the whole subject with ridicule? - while what looks like an honest and truthful report is either ignored and treated to the conspiracy of official silence, or brushed off with no attempt to produce proper evidence for a démenti.

Just one final curious and perhaps ominous incident: On August 23, 1954 - see what precedes, as to this strange coincidence of dates! --- Only five minutes flying time from Schihpol airdrome, Amsterdam, Holland, the radio of an incoming airliner from N.Y. (Hollander K.L.M. four-engined Douglas) suddenly went silent. A few seconds later, people near Amsterdam saw a strange flash and glare in the sky. It must have been that, at this time, the airliner plunged into the North Sea, and only the body of a young twin American boy named Yarrow, of Woodbury, Connecticut, has ever been found. - Now consider this: In late July, 1954, there occurred two mysterious interruptions to radio -- one British, and one U.S., airliner --and the interruptions lasted one hour. In these two cases, a search by sea and air found that the airliners were safe--but, in this third case, the airliner whose radio was so interrupted, lies at the bottom of the North Sea.- Is this merely a coincidence?

-- end --

-COPY OF LETTER RECEIVED BY ASSOCIATE GEORGE C. WILSON from UNITED PRESS PHOTOGRAPHER, JOHNNY BJORNULF, DATED JULY 31, 1954, AT FREDRIKSTAD, NORWAY.

"Dear Sir:

Enclosed find two pictures of Flying Saucers. They are enlarged from 16 mm. color film; number two is taken one second before number seven. Camera speed was 32 pictures per second. - Many thanks for your interest." (signed: J. Bjornulf. -- Then the following was added:)

July 17, 1954. --- "An Unexplainable Phenomenon", says Astronomer Brahde. The 'Flying Saucers' have dragon-shaped tail and are not caused by re - flexes or lens failures.

Yesterday "Aftenposten" had the opportunity to see the film shot by Johnny Bjornulf during the eclipse. Present was astronomer Rolf Brahde. What was above all interest were the pictures where the 'flying saucers' were visible. It was a fantastic sight to see the two strong illuminant objects travel across the sky in opposite direction of the aircraft. It may be remembered from the pictures published earlier in "Aftenposten", that the 'flying saucers' were located in the upper left corner of the pictures. It is beyond doubt that the objects are traveling at high speed and with considerable descent. One of the 'saucers' descends steeper than the other one. In the original film and in the copies may be seen two distinctive visible stripes in connection with the 'saucer'; two stripes in the front and two in the rear. The stripes form an angle from the aft tip of the flying object. The aft of the two 'flying saucers' produces a brighter field in the sky together with the stripes above mentioned. The same type of bright area might also be seen from the other stripes ahead, but does not reach further back than the next line behind.

The angle-lines at the dragon-shaped tail resemble very much the shock-waves produced when the object travels at supersonic speed. The 'dragon' is longer on the upper side than below. This may perhaps be caused by thinner air on the upper side. It is, however, at present very difficult to give any explanation of this phenomenon. Astronomer Brahde, who was present when the film was shown, states that he cannot give any reasonable explanation of this mystery. "We are facing a very strange thing," he says, "and according to my opinion, it is not any failure of the lens of the film-camera. The 'saucers' are not meteorites, because they would have descended at a far greater speed than the two objects registered on Mr. Bjornulf's film. The theory of reflexes is also excluded. Further, I do not believe that it is a sort of flash light, because the aircraft was traveling far above the cloud strata and because the aircraft was in an area completely free of cirrus-clouds. The illuminant objects may, however, be dark. Anyhow, the sunlight has possibly contributed to make them strongly illuminant, and I do believe that we are facing some sort of emissions in the stratosphere. This means that the objects receive energy from the sun. I am not able to give any explanations of the 'flying saucers' or of the connected shock-waves", Mr. Brahde states.

It is beyond doubt that we are facing one of the most curious phenomena in space, and that science here has a difficult problem to explain.

The film was shot from the left side of the aircraft; it is to the north, because the central line of the eclipse was followed from the west, when the shot was taken.

BOOKS RECEIVED:*

ZONE THERAPY or Relieving Pain at Home. Wm.H. Fitzgerald, M.D. & Edwin F. Bowers, M.D. Pub. by I.W. Long, Columbus, Ohio: 1917. 982 pgs. $3.00. The best thing we have seen on this interesting and effective therapy. To be reviewed later.

APOLLONIUS OF TYANA - Founder of Christianity. Alice Winston. Vantage Press, Inc. 120 W. 31st, New York 1, N.Y. Sept. 1954. 125 pgs. This book consists of readings from the Akashic Records by a gifted clairvoyant, and presents a series of detailed scenes from the life of a great philosopher and mystic. Many books about Apollonius have been destroyed or effectively suppressed, and accurate information is hard to come by - yet the subject is one of great religious and cultural importance. ($3.75

ATLANTIS TO THE LATTER DAYS. By H.C. Randall-Stephens (El Eros). Aquarian Press, London, Eng. 160 pgs., 1954. 13 s net. (1 s = .14). A series of communications purporting to emanate from an ancient Egyptian Priest, previously published in three volumes in the early 1930's. The present book tells how the author proved the identity of the voice, and recounts various detailed prophecies received. (Page 158 ff contains comment on the 'flying saucers'. These cosmic forces "do not come from any spheres of gross matter . . . They have the power to create a magnetic conveyance along a track between the material and spiritual planes". 'They can materialize and dematerialize this conveyance, and control the magnetic power much as we control radio beams, but they operate it direct and without any material medium such as a radio set ... These conveyances do not land and are not for the purpose of making personal contact... Their work is to draw together through magnetic force any break or leak in the magnetic envelope surrounding this earth.'

THE SECRET OF LIFE: by Georges Lakhovsky; Preface by Professor d'Arsonval. Translated from the French by Mark Clement. Cosmic rays and radiations of living beings. One of the most revolutionary works of our times. Of basic importance in radies - thesia and all magnetic and radionic therapies. Pub. by True Health Pub. Co., 152 Landor Road, Stockwell, S.W. 9, Eng. (1st printing was in 1935; 2nd revised edition, 1951. Translated into five languages. 208 pgs Price 25 s. ($3.50). We call the attention of all BSR Associates to this highly important work.

Newark, N.J. Star-Ledger: Sept. 30, '54. "Saucer men want lid lifted" (Detroit INS).

Inspired by a speech by a cousin of British Prime Minister Churchill, the Detroit Flying Saucer Club has begun circulating petitions requesting President Eisenhower to take the secrecy lid from the new form of space travel.

Desmond Leslie, saucer expert from London and former RAF pilot, told of investigating 100 reported sightings, six landings, and six personal contacts. He leaves by ocean liner today to check a report from Italy. He agreed that the US is withholding information and explained: "These saucer men are far superior to us. They have no wars and are thousands of years in advance of us. Look what they could teach us ... a man from outer space may be in this audience right now.

The petition accuses the Defense Department of concealing flying saucer facts and asks that the Government come forward "and make an honest and forthright statement."

MISCELLANEA:

Saucers in France: Lyon: Reuters: Sept. 30. France's flying saucer circus continued to rouse interest around the country today as more eye-witness accounts of whizzing celestial objects kept pouring in. Now a farmer says a creature came up to him on a lonely road, caressed his arm and burbled unintelligible noises at him. Then it went off toward its 'saucer', which the farmer could not describe because a green ray was directed at him and caused him to be temporarily paralyzed. (Assoc.C.M.Dorr.

Quake in the Anchorage Area, Alaska, was apparently more severe than first reported. "The tremor shook a 1,000 mile area but was felt most severely in a triangular area 80 to 100 miles west and south of Anchorage. It cracked walls and shattered windows at Anchorage, Seward, Valdez and Homer and was felt at Fairbanks and Kodiac..

(Cr. Assoc.Geo. E.Wilson) (Sta.Barbara News-Press, Oct. 4.

Green-Blue Object made its 4th appearance in the sky over Sand Springs, Okla., Sept. 26. It moved above the trees and among them and disappeared in the direction of Tulsa after about five minutes. The object was described as having "a dim glow around it and making a low moan as it moved". Four to five hundred people turned out for three nights to watch the object - according to Wichita Eagle of 9-27-54.

"The Thing" is the name given it by the Barber Co. Index (Medicine Lodge, Kansas, Sept. 23). One Jim Fleming and "several other persons" saw it first. It looked like a 4th of July sky rocket with a small white tail; then an "immense, fiery, multi - colored tail shot out from it, very long and wide. The object put on a burst of speed and disappeared toward the southwest, leaving a white trail, and later a luminous patch oflight for about five minutes..

(Last 2 clips from Assoc. H.E. Schmidt.

F.S. Investigation Committee: Melbourne, Australia, reports on a very thorough investigation of 55 sightings: several of the more unusual ones follow: (1) A girl, near Melbourne, asserted that on a cold, clear night a dark shape appeared from behind a factory and whirled over her ... she shined a torch on it ... it was about 30 ft. long and 15 ft high, with a canopy on top and windows at each end. It gleamed with a bluish, silver-gray light. "Similar objects were seen by others in the neighborhood.

At Templestone, near Melbourne, a woman reported hearing a humming sound, and then noticed an "enormous" saucer-shaped object hovering over a nearby field.

(3) "A third case was reported by a woman who heard a humming noise and saw a shining gold-colored object circling in the sky. It whipped over the horizon; then, minutes later, a cigar shape zoomed up from where the other had disappeared. This object looped, leaving puffs of smoke behind it, then shot away."

Pint-sized Man with pointed ears, seen by a Comanchee Co. (Kansas) farm boy - at distance of about 20 ft. Dark Complexion, tan clothing, carried two cylinders on his back. He ran from the boy to a partly concealed Saucer, about 50 ft. in diameter, 100 yds distant, which rose without tilting. Lights showed within as it took off. The sheriff, investigating, found many foot-prints, three of which were complete. Pear-shaped, about 4½" long, a little less than 2" across at the toes and with a very narrow heel. "The prints were not those of any animals. I know all the wild prints" said the sheriff. This story is given at length in The Evening Eagle, of Wichita. Kans., Sept. 8, 1954. (Cr. Assoc. H.E. Schmidt). (As an addendum - the Eagle has a remarkably enlightened editorial onthe story - "A Boy's Advantage Over Adults").

"ANGEL'S HAIR": We call attention of Associates to the article under this title, in PAGEANT magazine for November, '54; page 52 f. This substance resembles spun glass fluff or fine tinsel used in decorating Christmas trees, and has been reported several times since about 1951-2 - believed to have fallen from the UFO (Discs, saucers). In the Pageant article, Lt.Col. James C. McNamara gives careful details of a recent "fall", samples of which were collected in glass jars. If touched with the hands it "evaporates". Use a stick wrapped in black cloth for picking it up, and keep the jar closed. There seems to be no question about the Discs or other aeroforms being the source of this curious material. If opportunity offers, capture as much of it as is possible, in the way described - and don't be too generous with the first alleged VIP or "expert" who wants your whole supply. . . Of course, the AF doesn't believe Saucers exist anyhow, so the "fluff" can't exist either and the AF certainly wouldn't try to confiscate a mere rimless cipher, so to speak!

(Cr.Assoc. E.S.S.)

WE REGRET TO SAY, that BSR Hdqrs. is very hard-pressed for funds to meet ordinary operating expenses. As you all know, this is a non-profit set-up, and we depend largely on donations. Some of you have been generous in the past. Some of you can afford to help us again.- or for the first time, as the case may be. Or, if everybody donated even $1.00, the total would see us through. Or if 100 to 500 of you could send us (say) $5.00 each. This note, however, is "for your information". You know your own circumstances and what value you derive from our publications.

M.L.
